

Distinction Task: Evidence Progress in the Distinction Project

Overview of the task

For this unit, to achieve a distinction, you must complete a project. The project is to design, build and deploy an IoT solution that is demonstratably scalable. In this task, you need to demonstrate and provide evidence of your progress in the Distinction Project.

Submission Details

- `project_status.pdf`

Instructions

For D grades and above, you will be expected to complete three Distinction tasks from the unit. An initial project plan, a project status update and a final project submission. This submission is to provide a status update on on your project progress.

1. Provide a short document (4-5 pages) which contains a status update for your current project progress.
2. Export this document as a pdf e.g. `project_status.pdf`.
3. Submit all required files to [Ontrack](#).

You must discuss your progress document with your tutor to get this task signed off.
