

High Distinction Task: Research Report

Overview of the task

For those students aiming for a high distinction, you need to prove you can explore and apply the state-of-the-art in IoT scalability research. This means investigating published research in the area of scalable architectures relevant to IoT applications, designing this into your project and then evaluating this approach. The assessment for high distinction is a single report at the end of the unit.

Submission Details

- HD_project_report.pdf

Instructions

This submission is to provide the HD Research report.

1. Provide a short document (4-5 pages) which contains your HD Research report.
2. Export this document as a pdf e.g. **HD_report.pdf**.
3. Submit all required files to [Ontrack](#).

You must discuss your report with your tutor to get this task signed off.
